

Clitzzy

Eliciting Outer Elegance

Clitzzy is simple, easy-to-use, ready-to-use ASP.NET MVC and SQL Server database that enables you to create an online marketplace where multiple Stylists can open a new market place for themselves when they cannot afford for new business. As online e-commerce is at peaks and cost-effective Stylists can manage sales of their own products through one common web store.

Clitzzy is as simple as that any customer can easily understand and interact with its interface. This is for those who ever does not want to compromise on design and style and having an idea to customize their own style this is a platform for all

Note: The CSS layout and bootstrap themes are by a template 'Octopus' a cracked template using from Torrent.

Installation/Running

1. Download whole file from the drive and unzip it and open the solution in visual studio.
2. As this is a Database first approach I as you to run the database file first in sql server so that all tales will be formed and later run the code.
3. Open **Web.config** file and change values of **server name, database name**, in **connectionStrings** tag as below:
 - data source: your server name
 - initial catalog: your database name
 - user id: your username
 - password: your password
4. Run website and login with default account:
 - **Admin Panel (Admin access)**
URL: <http://www.yourdomain.com/Admin/Login>
Username: admin
Password: 123
Remember that you can change default admin URL in order to secure admin UI entry point.
 - **Vendor Panel (Stylist access)**
URL: <http://www.yourdomain.com/Vendor/Login>
Username: vishnu
Password: Vi@123
 - **Customer Panel (Customer access)**
URL: <http://www.yourdomain.com/Customer/Login>
Username: customer1
Password: 123
